Advanced Solutions for Science

Thursday 5th February 2015

Sala de Grados Edificio Torres Quevedo

Campus Río Ebro

C./ María de Luna, 3 50018 ZARAGOZA

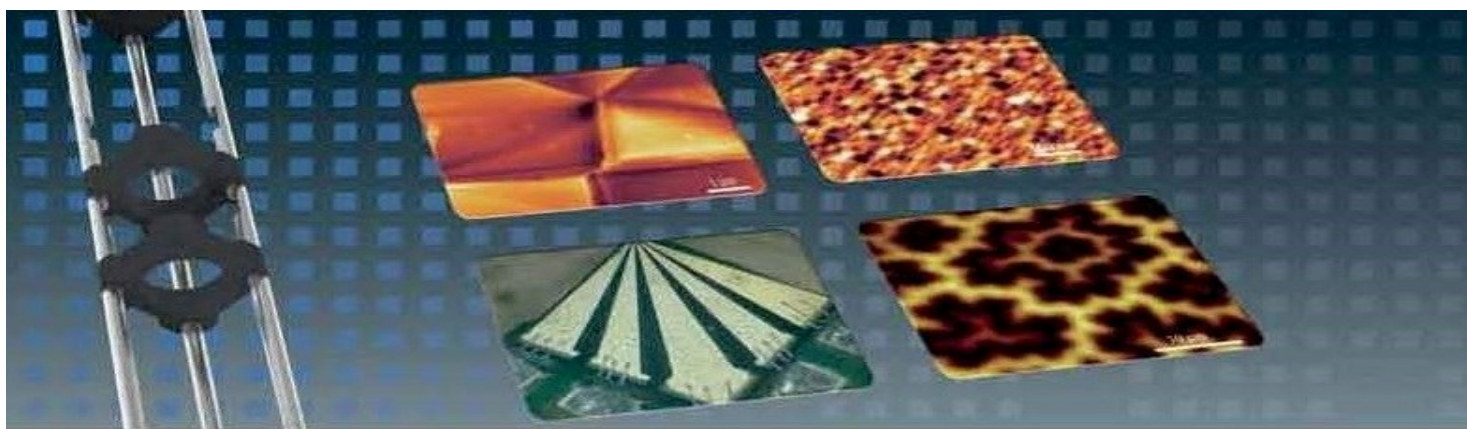

10.30h Inventive Solutions for Cryogenics and Microscopy

Dr. Cameron Hughes (Attocube Systems AG, Germany)

Abstract

Duration: 45 min

Attocube is a premium manufacturer for low vibration closed cycle cryostats and low temperature and high magnet field compatible scanning probe microscopes. These instruments enable cutting edge surface and bulk experiments in nanotechnology, material science, and other fields. In addition, a wide range of piezo based positioning devices and highly sensitive interferometric displacement sensors enable precision motion and displacement detection in a variety of temperatures and environments.

Low Temperature
