### Speaker

### Title

### Start at 12:00

Dr. Carlos Marcuello

Quantitative determination of physicochemical properties of soft matter by AFM

20th November 2020

Dr. Marta Navarro

Ultrathin and semi-thin sections of biological and polymeric samples for TEM and SEM

18th December 2020

Dr. Angel Merchán-Pérez

Use of Dual Beam for brain studies

15th January 2021

Dr. Blanca Bauluz

Use of Dual Beam for fossil studies

5th February 2021

Dr. Alvaro Mayoral

Towards local and averaged structural solution of catalysts at atomic level

2th March 2021

Dr. Leyre Hernández

2D metal-organic networks: electronic and magnetic properties

12th March 2021

Dr. José M<sup>a</sup> de Teresa

New developments and applications in Dual Beam

15th April 2021

Dr. Simon Hettler

Phase plates in Transmission electron microscopy

30th April 2021

Dr. David Serrate

New SPM techniques in the LMA portfolio: piezoresponse microscopy, non-contact AFM and molecular nanoprobe.

21st May 2021
